

## Resin Bound Brochure

---

# Wonders of the World

We work with stone quarries throughout the world to create the most diverse range of quality assured aggregates suitable for resin bound surfacing, available to UK and Irish contractors.

We are a resin manufacturer and aggregate importer that supplies resin bound kits.

We formulate and manufacture our own FeRFA compliant resin binders in-house, using our own chemists.

Resin Bound systems are dependent equally on the strength of the resin and the aggregate combined, which is why we manufacture and source both components.

A resin bound aggregate kit must have all components formulated and developed in unison. We believe this gives Vuba an enormous value proposition in comparison to alternative options in the market.

The 4C's of Wonders of the World

**Colour**  
Improved Aggregate Shine and Reduced Shading

**Contemporary**  
Exclusive Monochromatic Greys and Neutral Colours

**Consistent**  
Superior Aggregate Uniformity and Range

**Clarity**  
Superior Aggregate Cleanliness and Reduced Shading

Superior aggregates

Exclusive Monochromatic Greys

Warm toned or blue toned?  
Light, dark, or mid?  
Poseidon or Manhattan?

Grey surfacing is clean, understated and effortless, with the ability to take on all kinds of character depending on the undertone you choose.

Contemporary and Neutral Colours

This Architectural group deepens from the pale, off white Alaskan Tundra, to the deeper tones of Castle Mill, offering a striking but easy-to-use palette.

An excellent alternative to the buff colours that that tend to be favoured by architects, these retain a minimal, almost industrial feel, but inject a little more character.

Golden Browns and Earthy Reds

Our traditional range of colours have a very modern feel. Each mix a blend of Quartz, Marble and Flint.

There is a distinct but subtle nod to traditional resin surfacing colours, whilst preserving a clean modern look.
